

WILD ROSE SOLAR PROJECT

Shine Bright Like the Sun

Wild Rose Solar Project, LLC is proposing a 90 MW solar energy facility in Nelson County, bringing many positive impacts to the local economy and community.

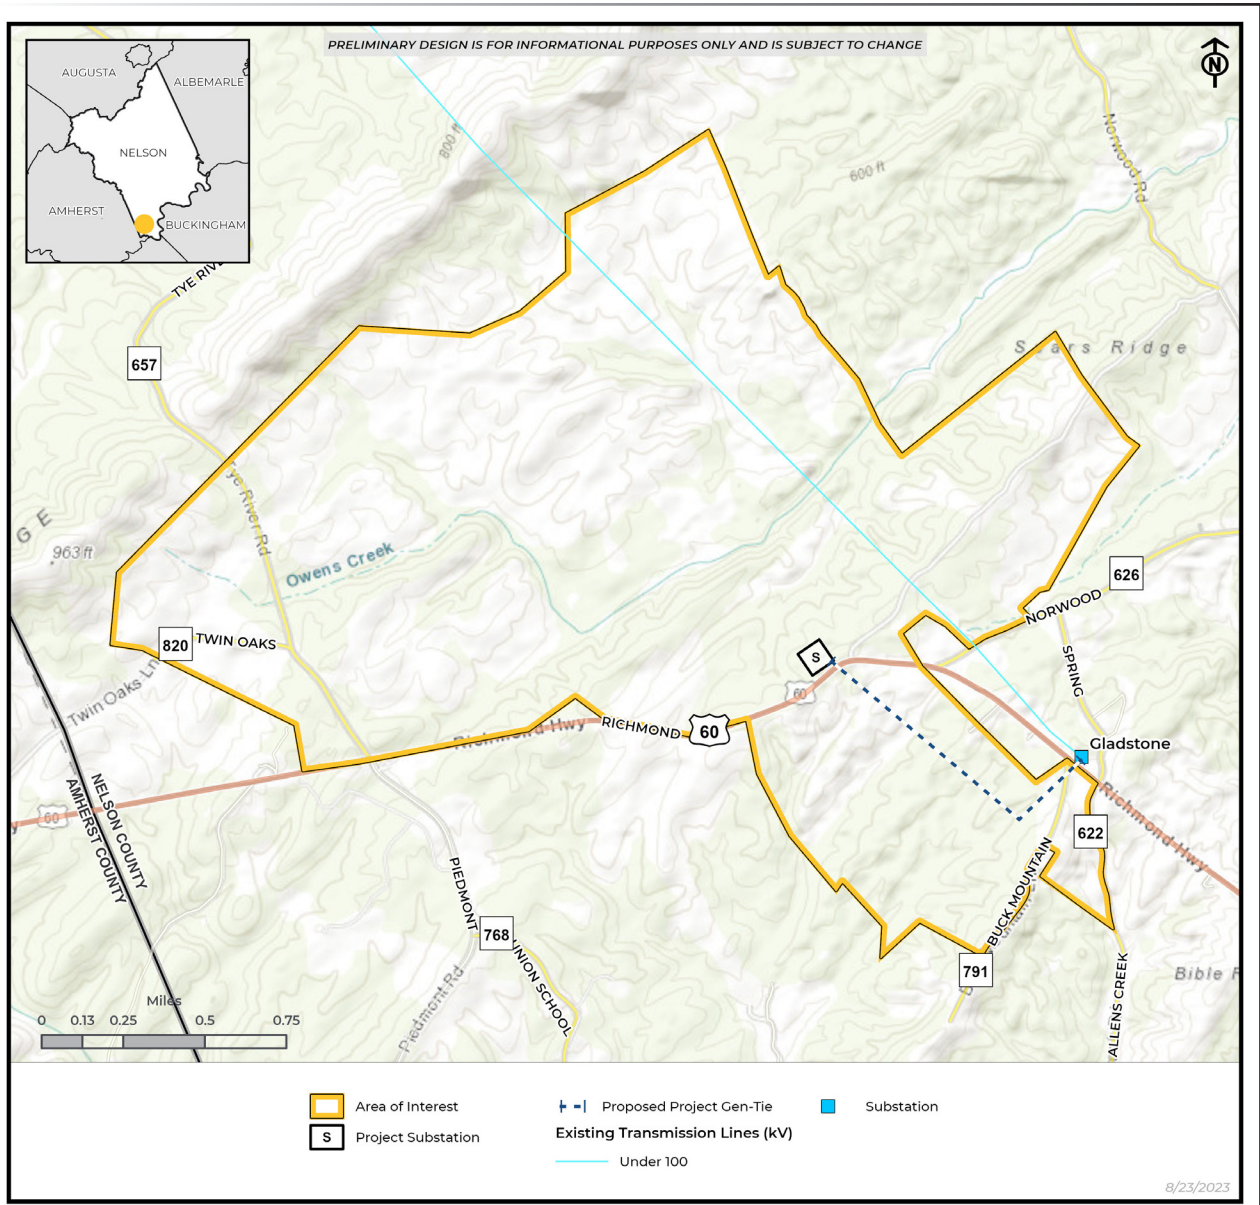

A solar project is an economic development opportunity for landowners and local tax jurisdictions to harvest new stable rent and property tax revenue from sunlight.

We are excited to be working in partnership with the Nelson County community on an opportunity to host a clean, environmentally compatible, renewable energy generation facility.

WILD ROSE SOLAR PROJECT

The Benefits of Going Solar in Nelson County:

- New revenue for Nelson County
- Direct and indirect economic impacts from project spending on goods, services and wages, primarily during construction
- Will not increase local traffic during operations or create a burden on municipal and education services (e.g. sewer, water, emergency services, schools, etc.)
- Quiet, clean, energy generator has a reduced impact on the environment compared to other traditional options
- Provides a low cost, generation resource to help stabilize electricity costs
- Contributes to the diversification of the region's and nation's electricity grid
- Requires minimal water consumption during construction and operations
